

"Kids do well if they can" Dr. Ross Greene

How can we help our students do as well as they can?

Provides tailored
professional development
& evidence-based tools
that will assist you to:

Get to know your student:

Their personality, skills, interests, complex needs, triggers, sensitivities, stressors, levels of alertness, behavioural responses and more.

These are the windows to their internal world.

Observe ➡ Analyse ➡ Interpret ➡ Plan

Make informed decisions, set achievable goals, prioritise the student's needs, develop learning tools based on their strengths and learning styles, design an appropriate schedule, allow for processing time, engineer the environment, modify teaching practices, be prepared with tools and strategies for regulation to attain and maintain a calm yet alert state.

Evaluate effectiveness and benefit to student and whole class.
