

*The canteen lunch box program provides step by step visual books on how to prepare pizzas, popcorn and toasted sandwiches. This visual support provides the student information on what to do, how many to do and when they are finished. This supports the student's learning and reduces student anxiety. Some students may only complete one task e.g., sprinkle cheese on pizzas, others may complete all steps in food preparation. The TEACCH structured learning is all about the student being independent in their task.*
